https://infinite-caverns-91282.herokuapp.com/

https://github.com/Yeiska/burger

Eat-Da-Burger! is a restaurant app that lets users input the names of burgers they'd like to eat. Whenever a user submits a burger's name, your app will display the burger on the left side of the page -- waiting to be devoured. Each burger in the waiting area also has a Devour it! button. When the user clicks it, the burger will move to the right side of the page. Your app will store every burger in a database, whether devoured or not.
It is used MVC design pattern using MySQL, Node, Express, Handlebars, ORM, Node.js, Ajax, Javascript, css, Bootstrap, and Github. To deploy it is used Heroku.

https://yeiska.github.io/Dog-Clicky-Game-App/

This app is a memory game with React. It break up the application's UI into components, manage their state, and respond to user events. It render different images to the screen. Each image listen for click events and keep track of the user's score, with should be incremented when clicking an image for the first time or should be reset to 0 if they click the same

image more than once. The images rendered to the page should shuffle themselves in a random order. Once the user's score is reset after an incorrect guess, the game should restart. Technologies used:React, ES6, Bootstrap, CSS.

https://yeiska.github.io/unit-4-game/
This game use Github, html, JavaScript, css, Bootstrap, jQuery.
